

Unlock the full potential of Microsoft 365 Copilot

Cubit Technology can guide our clients on AI, from making sure your environment is ready and secure, to embedding Copilot into your team's daily workflows and then tracking the return on your investment.

Step 1: Copilot Readiness Assessment

Before deploying any AI tool, we assess your Microsoft 365 tenant to identify risks, gaps, and opportunities, giving you a clear picture of what needs to be in place first.

PREREQUISITE TO ADOPTION

WHAT YOU GET

- Data governance review
- Microsoft 365 usage audit
- Security & compliance health check
- Adoption roadmap with recommendations
- Delivered in approximately 2 weeks

Step 2: Copilot Adoption

With your environment ready, we deploy Copilot for Microsoft 365 alongside the tools and training your team needs to make it stick, then review what's working after four weeks.

**MINIMUM 5 COPILOT
LICENCES REQUIRED**

WHAT YOU GET

- Identification of the users who will benefit most
- Deployment of 'Prompt Buddy' sharing tool
- SharePoint-hosted Adoption Hub with resources
- 4-week adoption window with metrics and review
- Recommendations for next steps

Optional Add-ons

Microsoft 365 Data Governance · Defender for Office 365 · Microsoft Tenant Hardening · Identity Management
